PROFESSIONAL SUMMARY

Telematics Engineer and Front-End Software Developer with over 5 years of experience designing and developing high-impact web and mobile applications. I have held roles such as Development Team Lead, Frontend Developer, and Developer Analyst, leading teams, defining software architectures, and implementing scalable solutions using React, Next.js, TypeScript, Angular, React Native, and Tailwind CSS.

I am passionate about solving complex problems through technology, building high-quality products, and transforming business requirements into efficient, intuitive, and maintainable solutions. My key strengths include technical leadership, analytical thinking, innovation, and a strong commitment to excellence in software development.

TECHNICAL SKILLS

React	**Expert**	Next.js	**Experienced**
TypeScript	**Expert**	JavaScript	**Expert**
Tailwind CSS	**Expert**	React Native	**Expert**
Expo CLI	**Expert**	HTML 5	**Expert**
CSS	**Expert**	NativeWind	**Expert**
Bootstrap 5	**Expert**	Microfrontends	**Experienced**
Web Component	**Experienced**	LitElement	**Experienced**
Storybook	**Expert**	Vite	**Expert**
Git	**Expert**	Figma	**Expert**
Feature Driven Development	**Expert**		

PROFESSIONAL EXPERIENCE

Feb 2025 — Present | Developer Analyst, TOPAZ | Bogotá

As a Developer Analyst, I am responsible for performing development, design, research, technical support, programming, maintenance, testing, and documentation activities for medium-complexity COBIS systems. I work on core banking solutions, contributing to the development and maintenance of critical functionalities that support the organization's financial operations through internal technologies based on Angular, JavaScript, and TypeScript. I collaborate in building and evolving various software products, providing user support and resolving application-related incidents. Additionally, I analyze and validate legacy developments, identify opportunities for improvement, and propose solutions to optimize existing products. I also participate in development planning, effort estimation, and timeline tracking, ensuring compliance with quality standards and business requirements.

Jun 2023 – Dec 2024 | Senior Front-End Developer, Trades.org | Bogotá

Participated in the research, design, development, and management of modern web applications using React, Next.js, TypeScript, Tailwind CSS, and Component-Driven Design tools. I was responsible for conducting technical assessments, evaluating new modules, and optimizing existing applications to improve performance, maintainability, and user experience. I collaborated in defining modular, component-based architectures, implementing Web Components through Custom Elements and Shadow DOM, as well as developing reusable components with LitElement. Additionally, I contributed to implementing Microfrontend architectures, enabling functionality decoupling, improving platform scalability, and facilitating long-term maintenance and evolution. I also actively participated in preparing technical documentation, defining and implementing development processes, generating metrics, conducting code reviews, and coordinating development activities. Furthermore, I prepared technical reports covering functional specifications, project progress, and overall project status, contributing to effective communication between technical and business teams.

Feb 2020 – Mar 2023	Development Team Lead, Eureka Dreams	Bogotá

Served as a Development Team Lead, leading multidisciplinary teams in the design, planning, and implementation of high-impact web and mobile solutions. I was responsible for coordinating development activities, assigning tasks, monitoring progress toward objectives, and ensuring the technical quality of deliverables through code reviews, best-practice implementation, and developer mentorship. I participated in designing and implementing scalable and maintainable software architectures, developing cross-platform mobile applications using React Native and Expo, as well as web applications using React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, and JavaScript. Additionally, I promoted reusable component-based development and architectural practices focused on maintainability and product evolution. I maintained direct communication with clients and different business departments to gather and analyze requirements, define functionalities, and create User Stories. I actively participated in project planning and management using agile methodologies, leading Sprint organization and tracking, effort estimation, backlog prioritization, and team progress monitoring to ensure project objectives were achieved. Furthermore, I contributed to technical decision-making, complex problem-solving, continuous improvement initiatives, and process documentation, helping deliver high-quality solutions aligned with client requirements and organizational strategic objectives.

EDUCATION

Jun 2021 – Jun 2024	Telematics Engineering Universidad Distrital Francisco José de Caldas	Bogotá
Jun 2016 – Jun 2021	Technologist Degree in Data Systems Management Universidad Distrital Francisco José de Caldas	Bogotá
