About me

Telematics engineer and data systematization technologist; Front-End software developer passionate about creating interactive and engaging experiences. With a solid background in software development technologies and experience in project management and development, I have gained knowledge in programming languages, frameworks, and libraries that make me competent for any challenge. My goal is to use my technical skills and creativity to build intuitive and attractive user interfaces that enhance user experience and meet the requested business objectives.

Education

Telematics Engineering

Francisco José de Caldas District University
2021 - 2024; Bogotá

Data Systematization Technology

Francisco José de Caldas District University
2016 - 2021; Bogotá

Experience

COBIS TOPAZ

Yeny Angelica Pérez Álzate

Bogotá, Colombia

February 2025 - Currently

Position: **Developer Analyst**

As a Developer Analyst in my current role, I am responsible for development, design, research, support, programming, maintenance, technical testing, and documentation of medium-complexity COBIS systems. I collaborate in the construction of various software products for the organization, assisting users with issues related to the products. Additionally, I verify inherited developments, identify potential issues, suggest product improvements, and plan and estimate development timelines.

TRADESORG INC

Christian Rodríguez

1703 Deerfield Dr, Austin, Texas, 78741, US

June 2023 - December 2024

Position: **Front-End Web Developer**

I participated in the research, design, and management of software programs, as well as testing and evaluating new programs. I was also involved in modifying software to fix bugs and improve performance, as well as implementing software tools, processes, and metrics. I collaborated in the direction of software programming and the development of documentation, writing and implementing code, and preparing reports on programming specifications, activities, and project status. Additionally, I actively participated in the creation of design systems, contributing to the development of a coherent and functional aesthetic in user interfaces, which optimized the software's experience and usability.

EUREKA DREAMS (GALIMATICO S.A.S.)

Gustavo Alexander Agudelo Gordillo

Bogotá, Colombia

February 2020 - March 2023

Position: **Development Tech Leader**

Direction of the engineering team and mobile application developer using the React Native framework for cross platform native applications, utilizing the Expo tool; as well as web applications through HTML, CSS, and JavaScript markup languages, with an emphasis on software architecture.
